

## **Macsa and HM Systems agree on new distribution agreement for Denmark**

Macsa is the leader in laser coding and marking systems and has won international recognition for its innovative laser marking solutions over the last 15-20 years. HM Systems, one of Denmark's largest players within the field of industrial marking and coding, now partners up with Macsa distributing the complete range of Macsa products in Denmark and Macsa lasers for packaged goods in Sweden.

Henrik Thomsen, CEO of HM Systems explains: "The Macsa product range is a perfect fit for us as we provide innovative coding and marking solutions to our Danish and Swedish customer base and we look forward to working with Macsa in the coming years." Peter Ramsden, International Sales Director of Macsa further comments: "The co-operation between Macsa and HM will provide Danish and Swedish customers with the widest and most advanced range of upmarket lasers which are clean and without waste. They are modular lasers able to grow and adapt to new production needs." ICON 2, another recent innovation by Macsa in coding lasers has compact dimensions, high performance and easy to use interface and will also be available to our customers.

HM Systems will exhibit the Macsa range on upcoming trade exhibitions in the coming months.
